Question Text:

Universe: Based on information from PMK (for selected child) or from PMK or PPF (for sibling)

Note: Based on information about the selected child or sibling pertaining to the following variables: HLT_22, HLT_23, HLT_24, HLT_25.

Dexterity health status refers to a person's ability to use their hands. This is based on his or her ability to perform certain tasks using their hands or fingers. The use of special tools or the help of another person to aid in the performance of these tasks is factored into this concept of ability/disability.

Source:

<u>Answer Categories</u>	<u>Code</u>
Full use of hands and fingers	01
Dexterity limitations, no help required	02
Dexterity limitations, requires special equipment	03
Dexterity limitations, requires help with some tasks	04
Dexterity limitations, requires help with most tasks	05
Dexterity limitations, requires help with all tasks	06
Not stated	99

Variable Name: HUIDEMO **Length:** 2.0 **Position:** 121

Question Name:

Concept: Emotion health status

Question Text:

Universe: Based on information from PMK (for selected child) or from PMK or PPF (for sibling)

Note: Based on information about the selected child or sibling pertaining to the following variable: HLT_26.

Emotion Health Status refers to a person's emotional well-being. This is based on different levels of happiness and interest in life, and unhappiness.

Source:

<u>Answer Categories</u>	<u>Code</u>
Happy and interested in life	01
Somewhat happy	02
Somewhat unhappy	03
Very unhappy	04
So unhappy that life is not worthwhile	05

Question Name:

Concept: Pain health status

Question Text:

Universe: Based on information from PMK (for selected child) or from PMK or PPF (for sibling)

Note: Based on information about the selected child or sibling pertaining to the following variables: HLT_29, HLT_31.

Pain health status refers to the degree of pain that is usually felt by a person. This concept also considers whether this pain prevents him or her from performing certain activities.

Source:

<u>Answer Categories</u>	<u>Code</u>
No pain or discomfort	1
Pain - does not prevent activity	2
Pain prevents a few activities	3
Pain prevents some activities	4
Pain prevents most activities	5
Not stated	9

Variable Name:	HUIDHSI	Length: 5.2	Position: 126
Question Name:			
Concept:	Youth Health Utility Index		
Question Text:			
Universe:	Based on information from PMK (for selected child) or from PMK or PPF (for sibling)		
Note:	<p>Based on information about the selected child or sibling pertaining to the following variables: HUIDVIS, HUIDHER, HUIDSPE, HUIDMOB, HUIDDEX, HUIDEMO, HUIDCOG, HUPDPAD.</p> <p>This derived variable is a Health Utilities Index which provides a description of an individual's overall functional health, based on eight attributes: vision, hearing, speech, ambulation (ability to get around), dexterity (use of hands and fingers), emotion (feelings), cognition (memory and thinking) and pain. The version of the index used in OCHS is adapted from the HUI Mark 3 (HUI3). The index is designed to produce both an overall health utility score and eight individual attribute scores. Analysts can use either a single-attribute utility scale or look at the complete health state (levels on all eight attributes) on the overall utility scale to produce a measure of an individual's perceived health related quality of life (HRQL).</p> <p>The index is appropriate for use to describe and monitor the health of general populations, and has been extensively validated for use in cross-sectional and longitudinal population health studies. The 8 single-attribute utility scores measure functional capacity within a single attribute, and range from 1.00 (normal) to 0.00 (most disabled). In combination, these scores are used to produce a multi-attribute utility index producing a score ranging from 1.00 (perfect health), through 0.00 (health status equal to death) to -0.36 (health status worse than death). The value 9.99 is not stated.</p> <p>HUI3 question content resides in the public domain, and is not subject to copyright restrictions. The HUI3 algorithm is the property of Health Utilities Inc. and is protected by copyright. Statistics Canada is authorized, when requested, to share this algorithm with users who wish to replicate results or analyses conducted by Statistics Canada. The use of the algorithm for other purposes, or the sharing of it with others, is prohibited.</p> <p>Higher scale indicates better health index Range: -0.360 to 1 in increments of 0.001</p> <p>Reference: For a detailed explanation of the calculation of the HUI3 refer to: Feeny D, Furlong W, Torrance GW et al. Multiattribute and single-attribute utility functions for the Health Utilities Index Mark 3 system. Med Care 2002; 40: 113-128.</p>

Variable Name: SOS_01 **Length:** 2.0 **Position:** 849

Question Name: SOS_Q01

Concept: Perceived standing in life relative to other Canadians: range

Question Text: What is the number to the right of the rung where you think you stand at this time in your life, relative to other people in Canada?

Universe: Collected from PMK.

Note: Question is asked about the PMK.

The questions SOS_Q01, SOS_Q02, and SOS_Q03 are prefaced with the following text:

Please refer to the booklet. Think of this ladder as representing where people stand in Canada.

At the top of the ladder are the people who are the best off - those who have the most money, the most education and the most respected jobs. At the bottom are the people who are the worst off - who have the least money, least education, and the least respected jobs or no job. The higher up you are on the ladder, the closer you are to the people at the very top; the lower you are, the closer you are to the people at the very bottom.

Variable Name:	SOS_03	Length: 2.0	Position: 853
-----------------------	--------	--------------------	----------------------

Question Name: SOS_Q03

Concept: Perceived standing in life if still living in country of origin: range

Question Text: Now, think of this ladder as representing where people stand in your previous country. What is the number to the right of the rung, where you think you would stand, if you were still living in that country?

Universe: Collected from PMK where DVILU002 <> 11124 AND IMDP_15 > Year of birth + 17.

Note: Question is asked about the PMK.

The questions SOS_Q01, SOS_Q02, and SOS_Q03 are prefaced with the following text:

Please refer to the booklet. Think of this ladder as representing where people stand in Canada.

At the top of the ladder are the people who are the best off - those who have the most money, the most education and the most respected jobs. At the bottom are the

people who are the worst off - who have the least money, least education, and the least respected jobs or no job. The higher up you are on the ladder, the closer you are to the people at the very top; the lower you are, the closer you are to the people at the very bottom.

Variable Name: EAP_01A **Length:** 1.0 **Position:** 987

Question Name: EAP_Q01A

Concept: Num of times eating in secret - 4 weeks

Question Text: The following questions are about your eating behaviours in the past four weeks. Please select the response that best describes your behaviours in the past four weeks. If you can't remember exactly how often you did something, that's ok, just give an answer as close as possible to what you think you did.

In the past four weeks, how often did you eat in secret? Eating in secret is when you eat at certain times or places, so that no one can see you eating or no one knows you are eating (One example is eating in a bathroom).

Universe: Collected from Youth where MEM_AGE = (14:17).

Note: Question is asked about the Selected Child or Sibling (14-17 years old).

Topical Index

<u>Variable</u>	<u>Description</u>	<u>Page</u>
ACA: Academic basic		
ACA_01	Child attends school or not	131
ACA_02	Reason for child not attending school	132
ACA_03	Child's current school grade	132
ACA_04	Highest grade of school child completed successfully	133
ADD: Attention Deficit/Hyperactivity Disorder		
ADD_01	Anyone complaining about behaviour or performance in school	498
ADD_02A	Often not paid enough attention to details - 6 mo	499
ADD_02B	Often made careless mistakes in school - 6 mo	499
ADD_02C	Often had trouble focusing when playing or doing schoolwork - 6 mo	500
ADD_02D	Often told that he/she not listening when talked to - 6 mo	500
ADD_02E	Often had trouble following through with schoolwork or chores - 6 mo	501
ADD_02F	Trouble with schoolwork/chores even when one understood the task	501
ADD_02G	Trouble with schoolwork/chores even when not trying to be difficult	501
ADD_02H	Often had hard time getting organized - 6 mo	502
ADD_02I	Often tried to avoid concentrating or thinking hard - 6 mo	502
ADD_02J	Hates/dislikes things that require concentration	503
ADD_02K	Often lost or forgot important things - 6 mo	503
ADD_02L	Often got distracted by little things - 6 mo	503
ADD_02M	Often forgot to do routine things - 6 mo	504
ADD_03A	Often fidgeted with one's hands or feet - 6 mo	504
ADD_03B	Often squirmed in one's seat - 6 mo	505
ADD_03C	Often got up in class when not supposed to - 6 mo	505
ADD_03D	Often ran around and climbed on things when not supposed to - 6 mo	506
ADD_03E	Wanted to run around or climb on things even though did not	506
ADD_03F	Often had hard time playing quietly - 6 mo	506
ADD_03G	Was always on the go - 6 mo	507
ADD_03H	Often talked too much - 6 mo	507
ADD_03I	Often blurted out answers before the end of question - 6 mo	508
ADD_03J	Often had trouble waiting one's turn - 6 mo	508
ADD_03K	Often interrupted people who were being busy or talking - 6 mo	508
ADD_04	Had problems paying attention, being hyper/impulsive before age 7	509
ADD_05A	Problems paying attention caused problems - at school	509
ADD_05B	Problems paying attention caused problems - at home	510
ADD_05C	Problems paying attention caused problems - with family	510
ADD_05D	Problems paying attention caused problems - with friends	510
ADDP: Attention Deficit/Hyperactivity Disorder - Parent		
ADDP_01	Anyone complaining about behaviour or performance in school	565
ADDP_02A	Often not paid enough attention to details - 6 mo	565
ADDP_02B	Often made careless mistakes in school - 6 mo	565
ADDP_02C	Often had trouble focusing when playing or doing schoolwork - 6 mo	566
ADDP_02D	Often told that he/she not listening when talked to - 6 mo	566
ADDP_02E	Often had trouble following through with schoolwork or chores - 6 mo	567
ADDP_02F	Trouble with schoolwork/chores even when one understood the task	567
ADDP_02G	Trouble with schoolwork/chores even when not trying to be difficult	567
ADDP_02H	Often had hard time getting organized - 6 mo	568
ADDP_02I	Often tried to avoid concentrating or thinking hard - 6 mo	568
ADDP_02J	Hates/dislikes things that require concentration	569
ADDP_02K	Often lost or forgot important things - 6 mo	569
ADDP_02L	Often got distracted by little things - 6 mo	569
ADDP_02M	Often forgot to do routine things - 6 mo	570
ADDP_03A	Often fidgeted with one's hands or feet - 6 mo	570
